The ordinary celler under a house is a menace to health. It is derk, damp, and, of course, musty, while the things that are kept in it gather dust, mold and disease-breeding microbes. A cellar ought to have windows and good ventilation. Whatever else to do, keep the cellar scrupulously clean and dry. Remember that if the cellar is in an insanitary condition its odors reach to the upper floors of the house and contaminate it. Whitewash the walls with good lime, which is one of the most sanitary disinfectants, and never permit vegetabels, old papers, rags or ashes to accumulate in the cellar. They all breed disease.

Mrs. Fuller's whole life since the closing of the war has been devoted to literary and patriotic work. No matter whether your case is of long-standing or recent development, whether it is present as hay-fever or chronic Asthma, our method is an absolute cure. No matter what your age or occupation, our method will certainly cure you right in your own home.

We especially want to send it to those apparently hopeless cases, where all forms of inhalers, douches, opinm preparations, fumes, "patent smokes," etc., have falled. We want to show every one at our own expense that this new method will end all difficult breathing, all wheezing and all those terrible paroxysms at once and for all time. This free offer is too important to negice a single day. Write now and begin the cure at once. Send no money. Simply mall coupled a new order of business called Comrade Report.
